Global Economy

Global growth has recovered

World economy has been through a strong and widespread growth rate of 3.8 percent. Both developed and developing countries grew together with estimated growth rates of 2.3 percent and 4.8 percent, respectively.

Global trade has increased

The slowdown in global trade growth ended in 2017, and global trade increased by 4.9 percent. In 2017, there was an increase of 16 percent in commodity prices and a 13 percent increase in oil prices.

Inflation rose in developed countries

The rate of inflation was higher in developing countries compared to developed countries in 2017. Inflation in developed countries was realized at 1.7 percent level. Inflation rates in developing countries remained around 4.3 percent.

Interest rates continued to rise in the USA

In the USA, strong data coming in from both growth and employment markets supported the expectations of continued interest rate hikes by the US Central Bank (Fed). Consequently, US has also caused the rise in long-term interest rates to persist.

Capital inflows to developing countries

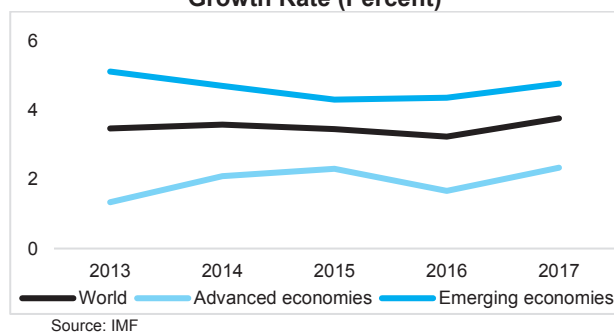

According to data of the International Finance Institute (IIF), there was a net capital inflow towards developing countries in 2017. Developing countries, with capital outflow of USD 283 billion in 2016, had a net capital receipt of USD 277 billion in 2017. 39 percent of the capital inflows were direct investments, 32 percent were portfolio investments and the remaining 29 percent were through other investments.

Turkey Economy: Summary

Growth accelerated

Following the slowdown in growth rate in 2016 that witnessed external and internal regionally induced multiple shocks and difficulties, Turkish economy experienced a rapid recovery in 2017; national income grew faster than the potential rate of growth. Due to supportive measures to economic activity, consumption, production and investment revived, employment increased, loan demand accelerated, and the payment system worked thoroughly. In the meantime, improvement in external demand backed by global recovery supported the growth positively.

Gross domestic product increased by 7.4 percent in real TL terms and decreased by 1.3 percent in dollar terms. Income per capita was TL 38,660 (USD 10.597).

Employment increased by 1.5 million

Economic growth also positively affected the employment markets. In 2017, when the labor force participation rate continued to increase, 1.5 million new jobs were provided.

Fiscal discipline continued

Despite spending-enhancing and income-reducing implementations that supported economic activity, budget revenues increased higher than anticipated due to the positive returns of rapid growth and the possibilities provided for public debt payments, maintaining the budgetary discipline. The ratio of the budget deficit to the gdp stood at 1.5 percent.

The ratio of outstanding domestic debt to gdp remained at a low level

Thanks to strong performance in balance of the budget, the ratio of outstanding domestic debt to gdp declined to 28 percent.

Debt rollover ratio rose above 100 percent

Despite low level of the budget deficit, due to precautionary borrowing of the Treasury over its financing needs, Treasury's debt rollover ratio exceeded 100 percent and became 125.6 percent after a long interval.

Inflation exceeded expectations

The growth in domestic demand, depreciation of the TL, the increase in imported oil and

commodity prices caused the inflation to stay over target through the demand and cost channel. Annual inflation was 11.9 percent in CPI and 15.5 percent in PPI.

The pressure on interest rates increased since the second quarter

In the last quarter of the year, an increase in market interest rates was observed as a result of developments in global markets coupled with geopolitical developments. The yield of the two-year benchmark bond rose to 14 percent.

During the second half of the year, expectations for higher Fed rates, and normalization in the monetary policy led to depreciation of developing country currencies. In 2017, TL depreciated 8 percent in real terms.

Current account deficit expanded

Import accelerated due to increase in domestic demand for imports of intermediate goods, raw materials, and growth in energy imports as well as the increase in prices of these products and the increase of gold imports. Therefore, the trade deficit widened despite the improvement in exports performance. Regardless of the restrictive effect of tourism income recovery, the ratio of current account deficit to gdp increased by 1.7 percentage points to 5.5 percent.

Capital inflow continued

Net capital inflows increased by USD 16 billion predominantly through portfolio investments. However, due to net capital inflow remaining below the current account deficit, international reserves decreased.

Measures from the Central Bank

Due to the increase in fluctuations in money markets, the Central Bank took new decisions in the last quarter of the year. Since November, Turkish Lira-Settled Forward Foreign Exchange Sale Auctions were held. Consequently, there is no change in the principal at the end of the maturity period, and if the exchange rate is below or above the exchange rate defined in the auction, the banks or the Central Bank pays the difference between the exchange rate and the forward foreign exchange rate in TL.

Turkey's economy grew fast in 2017

Gross domestic product (gdp) increased by 7.4 percent in constant prices and 19 percent in current prices in 2017, amounting to TL 3.105 billion. Gdp declined by 1.3 percent to USD 851 billion. Per capita income declined by 2.6 percent to USD 10.597 while gdp deflator realized at the level of 10.8 percent.

The industrial sector grew by 8.8 percent, the agricultural sector grew by 6 percent, and the services sector grew by 9 percent. Growth in the construction sector was 5.8 percent.

Final consumption expenditures of households grew by 6.1 percent in real terms and consumption expenditures of the public sector increased by 7.4 percent. Investments grew by 6 percent.

Exports increased by 12 percent, while import growth increased by 10 percent, thus foreign trade positively affected the growth.

Savings Ratio Increased

According to forecasts of the Ministry of Development the ratio of domestic savings to gdp increased by 0.5 percentage points to 24.9 percent. Savings ratio decreased by 1.1 percentage points in the public sector, and increased by 1.6 percent in the private sector. While the savings gap was at 2.5 percent of the gdp in the public sector, it was estimated to be at the level of 3 percent in the private sector.

Young and dynamic population

The population of Turkey is 80.8 million as of 2017. When age of population is listed in ascending sort, median age is 31.7 compared to the previous year.

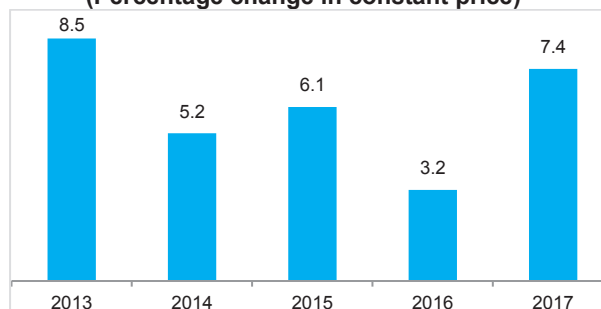

The annual rate of population growth decreased to 12.4 per thousand. Population of Turkey covers 54.9 million people (68 percent) at working age

Employment increased close to 1 million

Labor supply was 31.6 million, and employment was 28.2 million. While employment increased by 984 thousand, labor force participation rate rose by 0.8 percentage points. Number of unemployed was 3.5 million, and unemployment rate was 10.9 percent.

The increase of hourly labor cost of employees was 12 percent, decreasing compared to the year 2016. The rate of increase was 12.3 percent in industry sector and 11.6 percent in service sector, respectively.

General Assessment of the Banking Sector¹

Growth supported loan demand, loan supply supported economic activities

Despite the increase in external shocks stemming from global financial markets and geopolitical risks, Turkey's economy grew rapidly in 2017.

The rise in US interest rates, fluctuations in the international money and capital markets, volatility in the value of Turkish Lira, and the continuation of political tension in Turkey's neighbourhood had a limiting effect on economic performance.

Nonetheless, the supportive measures adopted by the Government re-accelerated the slowing down growth rate in a short period of time.

The economic activity, stimulated by incentives that encourage production and investment next to measures stimulating domestic demand, was supported by the improvement in external demand and the increase in investments as of the second half of the year. The banking sector supported growth and increase in employment by financing economic activity through loans provided by the Treasury backed Credit Guarantee Fund (CGF) guarantees.

The difference between loans and deposits was covered by shareholders' equity strengthened by the addition of profits and resources acquired from abroad.

Compliance with international standards in banking regulations was further continued. EU Council announced that Turkey was fully compliant with Basel regulations. During the transitional period to the IFRS 9, following the completion of regulations, test work was carried out throughout the year.

Core capital adequacy ratio kept its high level with 13.9 percent by increasing 70 basis points.

Loan volume exceeded the the total of deposits and shareholders' equity

As of end of the year, the volume of loans amounting to TL 2.112 billion (USD 560 billion) exceeded the sum of deposits amounting to TL 1.711 billion (USD 454 billion) and shareholders' equity amounting to TL 359 billion (USD 95 billion). Loan-to-deposit ratio realized at the level of 123 percent by increasing 3 percentage points.

Loans to be provided by the Treasury backed Credit Guarantee Fund guarantees accelerated loan growth and increased the need for financing

Loans increased by TL 364 billion (USD 96 billion). TL 316 billion (USD 84 billion) of this increase was financed with the increase in deposits and shareholders' equity, while TL 48 billion (USD 12 billion) of it was financed by non-deposit resources.

The increase in loans to be provided by the Treasury backed Credit Guarantee Fund guarantees in 2017 exceeded half of total loan growth with TL 212 billion (USD 56 billion).

¹ Unless otherwise stated, it includes deposits, development and investment and participation banks. BRSA data were used.
